

LNB

LANCERBIT

POS/MASTERNODE TECHNOLOGY WHICH IS THE MOST POWERFUL BLOCKCHAIN TECHNOLOGY OF OUR DAY.

LANCERBIT MINING STRUCTURE

LancerBit is not like other classic POW coins. Because of LNB block structure, blocks are never stuck. It always has a stable transaction. Most of digital currency have slow transfer rates and high transfer rates. But LancerBit offers instant and fully anonymous transfers; It gives us a real money instead of a simple value.

POS & Masternode Structure

POS & MASTERNODE STRUCTURE

MASTERNODE • REWARD

LancerBit is based on POS & Masternode mining. Masternode owners are entitled to 80% of the block award per block which are they find.

PROOF STAKE • REWARD

You can help to network stability with keep some LNB in your wallet and earn 20% of the block prize per block they find.

DEVELOPMENT PROCESS

LANCERBIT E-COMMERCE PLATFORM

LancerBit is launching a new era in the world of cryptography with eCommerce solutions.

When you want to have a website or get any internet services on the Internet, you have to make the payment via methods like Paypal, etc. But now Lancerbit will help you about secure payment! You offer work and price for your needs and then a developer accepts your proposal and all process starts to be tracked by the Lancerbit platform. Once the developer delivers the work, you confirm the payment and it is added to his account automatically. Moreover, you will enjoy the %100 secure trade both in the sales and purchase sides.
